## Introduction

Three Cross Motorcycles have a requirement to export Purchase Orders (PORs) from Exchequer. The POR export files created, will be in one of any of these 3 different formats :

- 1) Peugeot EDI
- 2) Softway (this covers Ducati, Moto Morini, MV & Cagiva)
- 3) Triumph

For this specification, we will only be implementing the first of these 3 formats : Peugeot EDI.

## Limitations

The following limitations will apply to this bespoke software:

- This bespoke software will require Exchequer v6
- The bespoke software will only function within the core Accounts Application; it will not function for Exchequer for DOS or for any applications using the Import Modules or Toolkits to integrate with Exchequer.
- The bespoke software will be outside of the scope of the password security for Exchequer.
- This Plug-In will only support the 1 file format described in this document. Any addition formats required now or in the future are outside the scope of this specification and development.
- This Plug-In will only allow you to export files to directories which have 30 characters or less in their directory path.
- Where a stock item has more than 1 description line, the Plug-In will only export the first line. Additional description lines will not be exported.
- The runtime licence for the Exchequer Toolkits will not be required for this bespoke software.
- The bespoke software may need modifications for future changes to Exchequer, this should be checked with Technical Support prior to installing any upgrades.
- Any functionality not described in this specification will not be implemented in the bespoke software development.
- No assumptions should be made that functionality implemented in the bespoke software will exactly duplicate Exchequer functionality, unless specifically stated in this specification.

## Contact Information

Any queries about this Plug-In or requests for changes should be done through your existing point of contact. If that person is unavailable then contact can be made with the Bespoke Business Analyst at IRIS Enterprise Software Ltd on 0844 815 5590.

This specification must be approved and returned unmarked to the Bespoke Business Analyst at IRIS Accounting & Business Solutions. A signed specification indicates your acceptance.

POR000581	22/07/2008	07/2008	ACEE02	£15,840.00		
POR000582	22/07/2008	07/2008	ACEE02	£330.00	Notes	
POR000583	22/07/2008	07/2008	ACEE02	£15,948.00	Notes	
PDN000642	01/12/2008	05/2008	SCOO01	£1.85		POR000580
PDN000643	01/12/2008	07/2008	ACEE02	£16.00	Notes	POR000583
PDN000644	01/12/2008	12/2008	SALE01	£1.85		POR000584
PDN000645	01/12/2008	07/2008	ACEE02	£6.00	Notes	POR000583
PDN000646	01/12/2008	07/2008	ACEE02	£6.00	Notes	POR000583
PDN000647	01/12/2008	07/2008	ACEE02	£6.00	Notes	POR000583
PDN000648	01/12/2008	07/2008	ACEE02	£6.00	Notes	POR000583
PDN000649	01/12/2008	07/2008	ACEE02	£6.00	Notes	POR000583

The user will highlight a POR in the list, and click on the "Export POR" button. When the button is clicked, a confirmation dialog will be displayed. For example :

**Export POR**

Are you sure you want to export this Purchase Order ?

Purchase Order : POR000565

Yes No

This specification must be approved and returned unmarked to the Bespoke Business Analyst at IRIS Accounting & Business Solutions. A signed specification indicates your acceptance.

Name	<input type="text"/>	Signature	<input type="text"/>
Position	<input type="text"/>	Date	<input type="text"/>

If the user clicks on the Yes button, then an export file will be created for the highlighted POR (Note: if the highlighted transaction is not a POR, a message will be displayed informing the user that they can only export Purchase Orders).

The Filename of the Exported File will be constructed as follows :

**PORXXXXXX\_YYYYMMDD\_HHMMSS.TXT**

**PORXXXXXX** : This will be the Our Ref for the POR (e.g. POR000123)

**YYYYMMDD** : This is the Current System Date in the format YYYYMMDD

**HHMMSS** : This is the current system time in the format HHMMSS

The file format and export directory to use for the export are defined by looking up the Supplier record for the POR (in my screenshot above this would be supplier OSRA01) :

User Defined Field 1 on the supplier record will hold the export format for the file. Possible values are as follows :

**P** : This denotes that the export file format for this supplier is the Peugeot EDI format.

**S** : This denotes that the export file format for this supplier is the Softway format (not implemented in this version)

**T** : This denotes that the export file format for this supplier is the Triumph format. (not implemented in this version)

This specification must be approved and returned unmarked to the Bespoke Business Analyst at IRIS Accounting & Business Solutions. A signed specification indicates your acceptance.

Name

Signature

Position

Date

Note : If User Defined Field 1 contains a different value to those defined above, a message will be displayed stating that an invalid format is stored against the supplier.

In the example above, the file would be exported in the Peugeot format.

User Defined Field 2 on the supplier record will hold the export directory for the file. In the example above the file would be exported to the directory **C:\Exports\**. The User Defined Field 2 on supplier records is limited to 30 characters, so you will not be able to export to directories which have more than 30 characters in their directory path.

Note: These 2 user defined fields will be populated manually in Exchequer, by the user.

This specification must be approved and returned unmarked to the Bespoke Business Analyst at IRIS Accounting & Business Solutions.  
A signed specification indicates your acceptance.

## File Format - Peugeot EDI

This file format is a fixed length, plain text file. Each line in the file is either a transaction header or a transaction line. There is a header line, which is then followed by a number of transaction lines. For example a POR with 14 lines on it, will produce a text file with 15 lines - 1 line for the transaction header, then 14 lines for the transaction lines :

CDPRE8091190700033654N120080923 ... (too long to show) ... *
